Unit	percent [%]
Available dimensions	total
Methodological explanations	<p>Data come from a sample survey: Labour Force Survey (LFS). The survey is conducted on a quarterly basis. The survey is conducted as continuous observation (movable survey week) what allows presenting the situation on the labour market during a whole quarter. The survey covers persons aged 15 and more who are members of households in dwellings selected on a random basis.</p> <p>In the context of economic activity - work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the three main categories are distinguished: employed, unemployed and economically inactive persons. The employed, unemployed are the economically active population.</p> <p>Lower secondary school educates the youth (aged 13-16) in a three-year cycle programme. Lower secondary education is compulsory. The formal requirement for admission to a lower secondary school is graduation from a primary school.</p>
Data source	Eurostat
Data availability	Annual data; since 2010
