

Statistics for the SDGs - global indicators

Name of the indicator	3.5.2 Consumption of alcohol per capita
Sustainable Development Goal	Goal 3. Good health and well-being
Target	3.5 Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol
Definition	Annual amount of 100% pure alcohol consumed per person (among people aged 15 and more).
Unit	litres
Available dimensions	total
Methodological explanations	<p>Consumption of some consumer goods per capita (among people aged 15 and more) - the source of the study is information on: the size of domestic production, imports, exports, inventories of warehouses and commercial enterprises.</p> <p>The calculation method is in accordance with the guidelines where 5% beers, 12% wines and meads are used for the conversion of pure alcohol. Data on consumption levels are compiled using the balance sheet method to assess global changes in food consumption in the country and can not be directly compared with household food consumption data based on the results of representative household budget surveys.</p>
Data source	Statistics Poland
Data availability	Annual data Since 2010.
