

Statistics for the SDGs - global indicators

| | |
|-------------------------------------|--|
| Name of the indicator | 6.4.2 Level of water stress freshwater withdrawal as a proportion of available freshwater resources |
| Sustainable Development Goal | Goal 6. Clear water and sanitation |
| Target | 6.4 By 2030, substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity |
| Definition | Gross abstraction as percentage of total renewable resources. |
| Unit | percent [%] |
| Available dimensions | total |
| Methodological explanations | The intensity of use of freshwater resources (or water stress) refers to gross abstraction of freshwater taken from ground or surfaces waters expressed in % of total available renewable freshwater resources (including water inflows from neighboring countries). |
| Data source | OECD |
| Data availability | Annual data since 2010. |
| Notes | |
