

Name of the indicator	<b>2.3.1 Labour per 100 ha of agricultural land</b>
Sustainable Development Goal	Goal 2. Zero hunger
Target	2.3 By 2030, double the agricultural productivity and incomes of small-scale food producers, in particular women, indigenous peoples, family farmers, pastoralists and fishers, including through secure and equal access to land, other productive resources and inputs, knowledge, financial services, markets and opportunities for value addition and non-farm employment
Definition	Number of labour units AWU in total in in units meeting the definition of a farm, per 100 ha of agricultural land.
Unit	AWU (Annual Work Unit)
Available dimensions	total, by area groups of agricultural land
Methodological explanations	<p><b>Annual Work Unit (AWU)</b> - conventional annual labour unit. It means the equivalent of full-time job and is calculated as the quotient of number of hours worked in the farm during the year and the annual number of full-time job hours.</p> <p>In Poland the equivalent of full-time job equals to 2120 working hours per year.</p> <p><b>Agricultural land</b> area includes agricultural land in a good agricultural condition and other agricultural land; see general notes.</p> <p>Agricultural land in a good agricultural condition includes: sown area, fallow land, permanent crops (of which orchards), kitchen gardens, permanent meadows and permanent pastures.</p> <p>Other agricultural land — agricultural land not cultivated and not maintained in a good agricultural condition.</p> <p>The indicator is calculated on the basis of data obtained from the Agricultural Census and Structure of Farms Survey.</p>
Source of data	Statistics Poland
Data availability	Data every few years; since 2010
Notes	<p>Proxy indicator, available within the Polish public statistics.</p> <p>An original indicator, adopted by the UN for monitoring target <b>2.3</b> of the 2030 Agenda is <b>2.3.1</b> Volume of production per labour unit by classes of farming/pastoral/forestry enterprise size.</p>
