

Name of the indicator	7.a.1 Official Development Assistance for climate change mitigation and adaptation
Sustainable Development Goal	Goal 7. Affordable and clean energy
Target	7.a By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology
Definition	Value of ODA commitments identified by Rio markers: climate change adaptation and climate change mitigation.
Unit	mln USD (current prices)
Available dimensions	total
Methodological explanations	<p>Official Development Assistance (ODA) comprises grants and loans that are provided by government agencies or international organizations to promote the economic development and welfare of developing countries. In order for loans to qualify as ODA, they need to comprise a grant element of at least:</p> <ul style="list-style-type: none"> • 45% of the total amount for LDCs and other LICs (calculated at the discount rate of 9 %); • 15% for LMICs (calculated at the discount rate of 7%), • 10% for UMICs (calculated at the discount rate of 6%). <p>ODA also includes technical assistance that aims at developing human resources and raising qualifications as well as technical and productive capacity of the developing countries. Technical assistance consists in, i. a., conveying knowledge and experience in the form of training, sending experts and commencing research and/ or covering its resultant cost. No military equipment or services are reportable as ODA. Moreover, it is also required that a partner country benefitting from assistance is on the OECD DAC (Development Assistance Committee) list of ODA recipients.</p> <p>Depending on the form of its realisation, development assistance might be distinguished into bilateral and multilateral. Bilateral assistance is undertaken by the donor country directly in the partner country or by an international organisation as earmarked contribution to the partner country or as a contribution for a specific programme/ fund managed by the organisation. Multilateral assistance is provided as a contribution to the general budgets of international organisations whose list is updated annually by the OECD-DAC Secretariat.</p> <p>The indicator is calculated on the basis of total ODA commitments identified by Rio markers for climate change adaptation and climate change mitigation with assigned scores 1 or 2. It should be noted, however, that current DAC OECD methodology for data collecting in Creditor Reporting System (CRS) enables identifying markers only in bilateral flows. Therefore, the indicator does not cover contributions to the general budgets of organisations, such as UNFCCC or UNEP, which operate within the scope of climate change.</p> <p>Additionally, some methodological activities are being conducted to incorporate other flows into ODA, such as mobilised amount of money by the public sector from the private sector instruments. Furthermore, an alternative to ODA, TOSSD (Total Official Support for Sustainable Development) is being developed as an instrument for measuring means for SDGs implementation.</p> <p>Official Development Assistance in Poland is provided in accordance with the Development Cooperation Act of 16th September 2011 (Journal of Laws of 2011, No 234, item 1386). Polish development cooperation is based on the Multiannual Development Cooperation Programme, developed for a minimum period of four years. In accordance with the document, the development cooperation includes all the actions undertaken by the government administrative bodies in order to provide the developing countries with development assistance and humanitarian aid as well as the implementation of educational actions for raising awareness and better understanding of global issues and interdependencies.</p> <p>The development cooperation in Poland is coordinated by the Ministry of Foreign Affairs that has devised Multiannual Development Cooperation Programme for 2016-2020 in accordance with which</p>

	<p>the focus of Polish development cooperation has been placed on Eastern Partnership countries (Belarus, Georgia, Moldova, Ukraine) as well as Africa, Asia and Middle East (Ethiopia, Kenya, Senegal and Tanzania, Myanmar and Palestine).</p> <p>Polish development cooperation supports strengthening the rule of law, decentralization reforms and combat against corruption as well as human and civil rights compliance. Its main objectives cover the improvement of health care, better access to education and support for entrepreneurship and agriculture as well as natural environment protection including natural disasters prevention. Activities included in the programme are financed with the resources from the Ministry of Foreign Affairs, target reserve of the state budget, designed for the development cooperation, and from the funds of other ministries.</p>
Source of data	Ministry of Foreign Affairs Republic of Poland
Data availability	Annual data; Since 2013.
Notes	<p>Proxy indicator, available within the Polish public statistics.</p> <p>An original indicator, adopted by the UN for monitoring target 7.a of the 2030 Agenda is 7.a.1 International financial flows to developing countries in support of clean energy research and development and renewable energy production, including in hybrid systems.</p> <p>Additionally, some methodological activities are being conducted to incorporate other flows into ODA, such as mobilised amount of money by the public sector from the private sector instruments. Furthermore, an alternative to ODA, TOSSD (Total Official Support for Sustainable Development) is being developed as an instrument for measuring means for SDGs implementation.</p>
