

Name of the indicator	17.13.1.b Macroeconomic dashboard: Indices of GDP (constant prices) previous year=100
Sustainable Development Goal	Goal 17. Partnerships for the goals
Target	17.13 Enhance global macroeconomic stability, including through policy coordination and policy coherence
Definition	The ratio of GDP value in a surveyed year to the respective value in the previous year, including a correction of price influence.
Unit	-
Available dimensions	total
Methodological explanations	<p>Constant prices result from average current prices in a given year. They allow for a more accurate observation of a given phenomenon through the elimination of the influence of current prices changes.</p> <p>Gross domestic product (GDP) illustrates the final result of the activity of all entities of the national economy (resident producer units – domestic) in a given year. The exact definition and methodology for calculating GDP is contained in the regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union (ESA 2010).</p>
