

Name of the indicator	11.3 Mixed municipal waste collected per capita in urban areas
Sustainable Development Goal	Goal 11. Sustainable cities and communities
Target	-
Definition	Weight of collected mixed municipal waste per 1 inhabitant of urban areas.
Unit	kilogram [kg]
Available dimensions	total
Methodological explanations	<p>Municipal wastes are defined as the wastes generated in households (excluding end of life vehicles) as well as waste which does not contain hazardous substances, coming from other waste producers, which in their nature or composition are similar to wastes generated in households; mixed municipal waste remain mixed municipal waste, even if they have been processed, which did not change substantially their attributes.</p> <p>Collection of wastes is the wastes gathering before their transportation to the places of processing, including preliminary sorting which does not lead to fundamental change of their character, composition and not resulting in change in the waste classification. It includes temporary waste storage.</p> <p>Mixed municipal wastes are wastes collected during the year without wastes collected selectively and separated from the dry fraction.</p>
Source of data	Statistics Poland
