

Statistics for the SDGs - indicators for national priorities

Priority Work activation of young people, women, persons aged 50+, long-term unemployed as well as persons with disabilities Definition Share of the unemployed persons aged 20-64 looking for a job for one year or more in the total number of the unemployed expressed as a percentage. Unit percent [%] Available dimentions total Data come from a sample survey: Labour Force Survey (LFS). The survey is conducted on a quarterly basis as continuous observation (movable survey week) what allows presenting the situation on the labour market during a whole quarter. The survey covers persons aged 15 and more who are members of household in dwellings selected on a random basis. In the context of economic activity - work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the tree main categories are distinguished: employed, unemployed and ecomically inactive persons. The employed, unemployed are the economically active population. Among the employed are included all persons aged 15 years or more who during the reference week: 1) performed for at least one hour any work generating pay or income, i.e. were employed as paid employees, worked on their own (or leased) agricultural farm or conducted their own economic activity outside agriculture, 2) had work but did not perform it: a) due to sickness, maternity leave vacation, b) due to other reasons, but duration of the break in employment: - did not exceed 3 months, - was longer than 3 months in case when these persons were paid employees and received during that period at least 50% of the hitherto earnings. Due to the survey methodological assumptions the number of the employee obtained from the LFS does not comprise some categories of persons, who are considered as employed in the establishment survey, i.a.: a) employees living in lodging houses for workers, b) employees working abroad for their Polish employers. Unemployed persons are persons aged 15-74 who simultaneously fulfil three	Name of the indicator	8.7.b Long-term unemployment as a percentage of the total unempolyment (LFS)
