

Statistics for the SDGs - indicators for national priorities

Goal 5. Gender equality Priority More complete fulfillment of the principle of women and men's equality The indicator measures the difference between the employment rates of men and women aged 25 to 54. Init D. p. Available dimentions Employment rate is a share of the employed people of a given category in the total population of a given category. The indicator is based on the EU Labour Force Survey (LFS). LFS is conducted on a quarterly basis. The survey is conducted as continuous observation (movable survey week) what allows presenting the situation on the labour market during a whole quarter rhs survey covers persons aged 15 and more who are members of households in dwellings selected on a random basis. In the context of economic activity – work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the tree main categories are distinguished, employed are the economically active population. Among the employed are included all persons aged 15 years or more who during the reference week: 1) performed for at least one hour any work generating pay or income, i.e. were employed as paid employees, worked on their own (or leased) agricultural farm, or conducted their own economic activity outside agriculture, assisted without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay) in conducting for company activity) if the break in employment did not exceed 3 months; if the break was longer than 3 months in case when persons were paid em	Name of the indicator	5.1.b Gender employment gap (aged 25-54)
Priority More complete fulfillment of the principle of women and men's equality Definition The indicator measures the difference between the employment rates of men and women aged 25 to 54. Intervallable dimentions Employment rate is a share of the employed people of a given category in the total population of a given category. The indicator is based on the EU Labour Force Survey (LFS). LFS is conducted on a quarterly basis. The survey is conducted as continuous observation (movable survey week) what allows presenting the situation on the labour market during a whole quarter. The survey covers persons aged 15 and more who are members of households in dwellings selected on a random basis. In the context of economic activity — work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the tree main categories are distinguished: employed, unemployed and economically inactive persons. The employed, unemployed are economically active population. Among the employed are included all persons aged 15 years or more who during the reference week: 1) performed for at least one hour any work generating pay or income, i.e. were employed as paid employees, worked on their own (or leased) agricultural farm, or conducted their own economic activity outside agriculture, assisted (without pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted without pay in conducted their own economic activity outside agriculture, assisted to exceed 3 months; if the break in employment did not exceed 3 months; if the break was longer than 3 months in case when persons were paid employees the additional criterion is receiving during that period at least 50% of the hitherto earnings. According to international standards, among employees are also included persons performing outworks and apprentices with whom enterprises or natural persons signed a contract for occupational training or learning skills for a particular
