

Statistics for the SDGs - indicators for national priorities

Priority Ensurance of conditions for women's return to labour market after a break from employment due to childbirth and childcare Share of employed women with the youngest child up to 5 years old in the total number of womenwith the youngest child up to 5 years old. Unit percent [%] Available dimentions Data come from a sample survey Labour Force Survey (LFS). The survey is conducted on a quarterly basis. The survey is conducted as continuous observation (movable survey week) what allowspresenting the situation on the labour market during a whole quarter. The survey covers personsaged 15 and more who are members of households in dwellings selected on a random basis. In the context of economic activity – work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the tree maincategories are distinguished: employed, unemployed and economically inactive persons. Theemployed, unemployed are the economically active population. Among the employed are included all persons aged 15 years or more who during the reference week: 1) performed for at least one hour any work generating pay or income, i.e. were employed as paidemployees, worked on their own (or leased) agricultural farm, or conducted their own economicactivity outside agriculture, assisted (without pay) in conducting family agricultural farm or familyeconomic activity outside agriculture, assisted (without pay) in conducting family agricultural farm or familyeconomic activity outside agriculture, assisted (without pay) in conducting family agricultural farm or familyeconomic activity outside agriculture, assisted (without pay) in conducting family agricultural farm or familyeconomic activity outside agriculture, assisted (without pay) in conducting family agriculture in the passing state of the passing state o	Name of the indicator	5.3.a Employment rate of women with the youngest child up to 5 years old (LFS)
