

Statistics for the SDGs - indicators for national priorities

Goal 3. Good health and well-being Priority Decrease in morbidity and mortality due to civilization diseases Average number of years that a person lives in a healthy condition, i.e. without limitation in everyday functioning and without disability. Junit years Available dimentions Data on healthy life years come from the EU-SILC questionnaire survey - EU Statistics on Income and Living Conditions (Division 7. Health of the EU-SILC individual questionnaire). The survey covers adult persons aged 16 and more in a households. EU Statistics on Income and Living Conditions (EU-SILC) is the instrument which focuses on providing current and comparable at the Member States level data on income, poverty, social exclusion, living conditions and health state. It is a questionnaire survey carried out every year (with the use of the panel method in the four-year cycle which makes it possible to analyze changes in social phenomena an in the period of time covered by the survey). The organization and methodology of the survey is governed by the Regulation (EC) No. 1177/2003 of the European Parliament and of the Council of 16 June 2003 concerning Community Statistics on Income and Living Conditions (EU-SILC) is a non-obligatory, representative questionnaire survey of individual households, carried out by the face-to-face interview technique. For individual interviews a proxy interview is allowed with another household member who is able to provide reliable information concerning the person who should be covered by the survey (this is applicable to the household members who are absent in the place of residence at the time of the survey). HLY indicator serves to measure the number of years that a person lives in a healthy condition. It combines information on age-specific mortality (age-specific deaths) and unhealthy condition. A healthy condition is defined as one without limitation in everyday functioning and without disability. This statistical indicator is compiled separately for mer and women.
