

## Statistics for the SDGs - indicators for national priorities

Goal 5. Gender equality  More complete fulfillment of the principle of women and men's equality  The indicator measures the difference between the employment rates of men and women aged 25 to 54.  Intit  P. P.  Ivailable dimentions  Employment rate is a share of the employed people of a given category in the total population of a given category. The indicator is based on the EU Labour Force Survey (LFS).  LFS is conducted on a quarterly basis. The survey is conducted as continuous observation (movable survey week) what allows presenting the situation on the labour market during a whole quarter. The survey covers persons aged 15 and more who are members of households in dwellings selected on a random basis.  In the context of economic activity – work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the tree main categories are distinguished, employed are economically inactive persons. The employed, unemployed are the economically active population.  Among the employed are included all persons aged 15 years or more who during the reference week:  1) performed for at least one hour any work generating pay or income, i.e. were employed as paid employees, worked on their own (or leased) agricultural farm, or conducted their own economic activity outside agriculture, assisted whout pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted whout pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted whout pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted whout pay) in conducting family agricultural farm or family economic activity outside agriculture, assisted whout pay) in conducting for occupation in the preash in employment did not exceed 3 months; if the break was longer than 3 months in case when persons were paid employees when the additional criterion is receiving during that period at l	Name of the indicator	5.1.b Gender employment gap (aged 25-54)
