

## Statistics Poland Aleja Niepodległości 208 00-925 Warszawa Agenda2030@stat.gov.pl

Name of the indicator	3.7.1 Percentage of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods
Sustainable Development Goal	Goal 3. Good health and well-being
Target	3.7 By 2030, ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes
Definition	The percentage of women of reproductive age (15-49 years) who have their need for family planning satisfied with modern methods.
Unit	percent [%]
Available dimensions	total
Methodological explanations	The indicator is calculated on the basis of information obtained from the <b>European Health Interview Survey (EHIS)</b> . This study covers persons aged 15 and more in households living in the territory of the country.  The data concern the proportion of women at the reproductive age (15-49 years) who have sexually
	cohabited and declared using at least one modern method of contraception; ie use of a condom, contraceptive pill, other hormonal agents (e.g. slices, sprays) and mechanical, etc.
Source of data	Statistics Poland
Data availability	Data every 5 years; 2009, 2014.
Notes	Data presented in 2010 refers to the year in which the survey was conducted, i.e. in 2009.
